1.1. CM07 - Card Master Setup

Using this option, the bank can setup a card product with a validity period in years. Youcan select the following mode for issue of card:

- Online
- Batch
- Online & batch

The cards can be issued / reissued using the **Card Maintenance** option.

Definition Prerequisites

Not Applicable

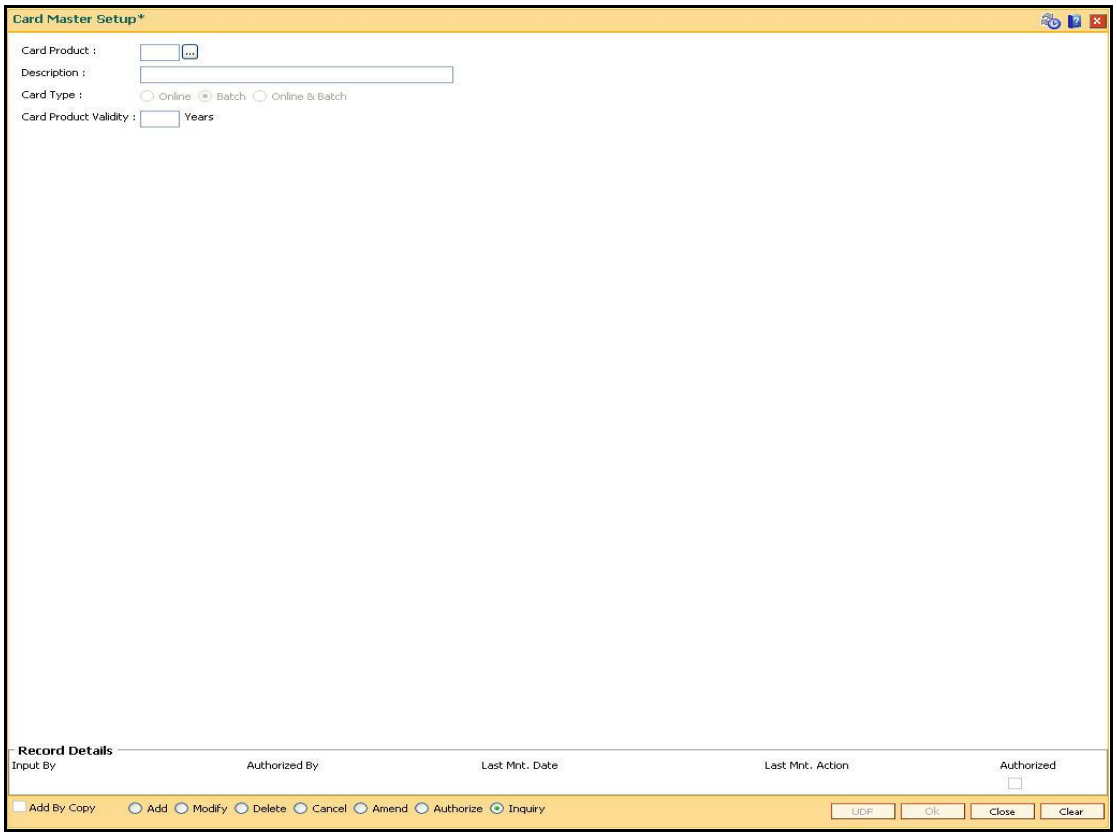
Modes Available

Add By Copy, Add, Modify, Delete, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To add a new card product

1. Type the fast path **CM07** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions >** Card Master Setup.
2. The system displays the **Card Master Setup** screen.

Card Master Setup

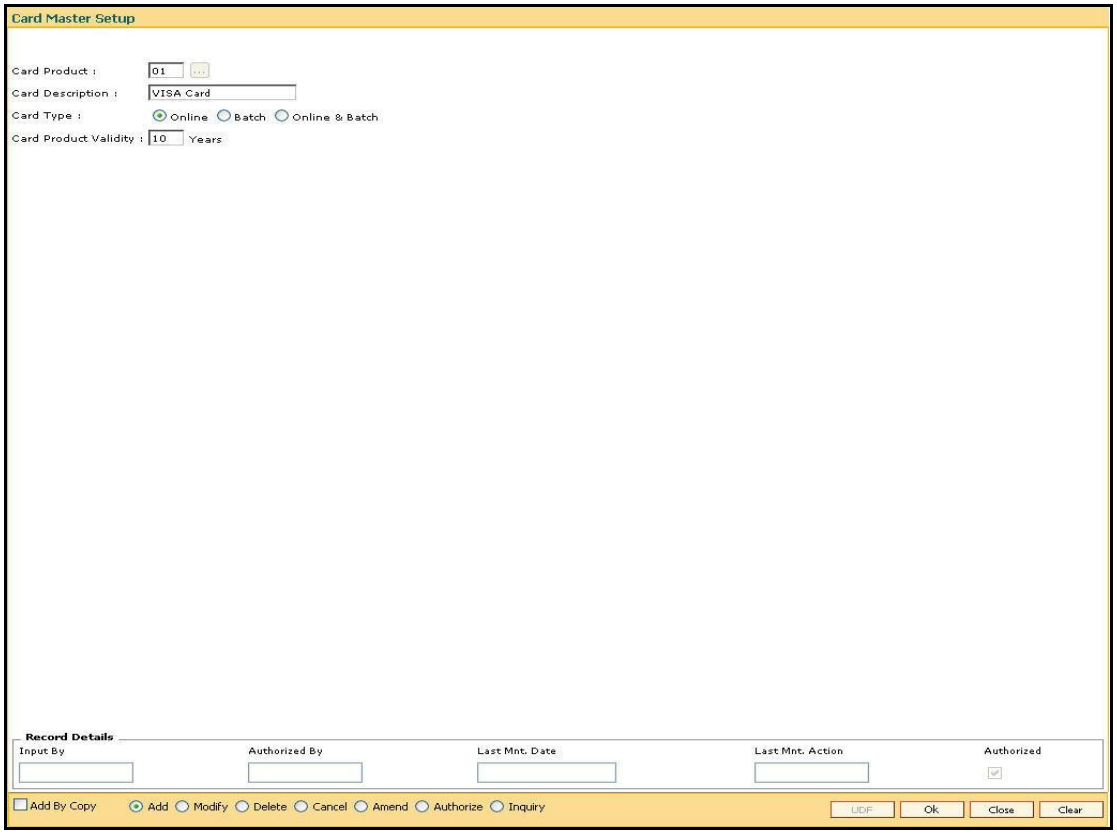


Field Description

Field Name	Description
Card Product	[Mandatory, Numeric, Three] Type the card product number to setup a new card product.
Card Description	[Mandatory, Alphanumeric, 36] Type the description of the card product.
Card Type	
Card Type	[Mandatory, Radio Button] Select the mode in which the card is issued. The options are: • Online • Batch • Online & Batch
Card Product Validity	[Mandatory, Numeric, Three] Type the validity period of the card product.

3. Click the **Add** button.
4. Enter the card details and click the **Ok** button.

Card Master Setup



5. The system displays the message "Record Added...Authorization Pending...Click Ok to Continue".
6. Click the **Ok** button.
7. The card master details are added once the record is authorized.

1.2. CM08 - Card-Account Product Link Setup

Using this option, the bank can link different account products to a card product. You can setup a card product using the **Card Master Setup** (Fast Path: CM07) option.

Once the card products are defined, that needs to be linked with the account products. After the accounts are opened under these products, the card details can be maintained using the **Card Maintenance** option. The account product which is attached to the card product can be either with the card facility or you can select the **ATM** check box in the **External Bank Facility** section in the **Account Details 2** tab in **Account Master Maintenance** (Fast Path:CH021) option

Definition Prerequisites

- CM07 - Card Master Setup
- Account Product Definition

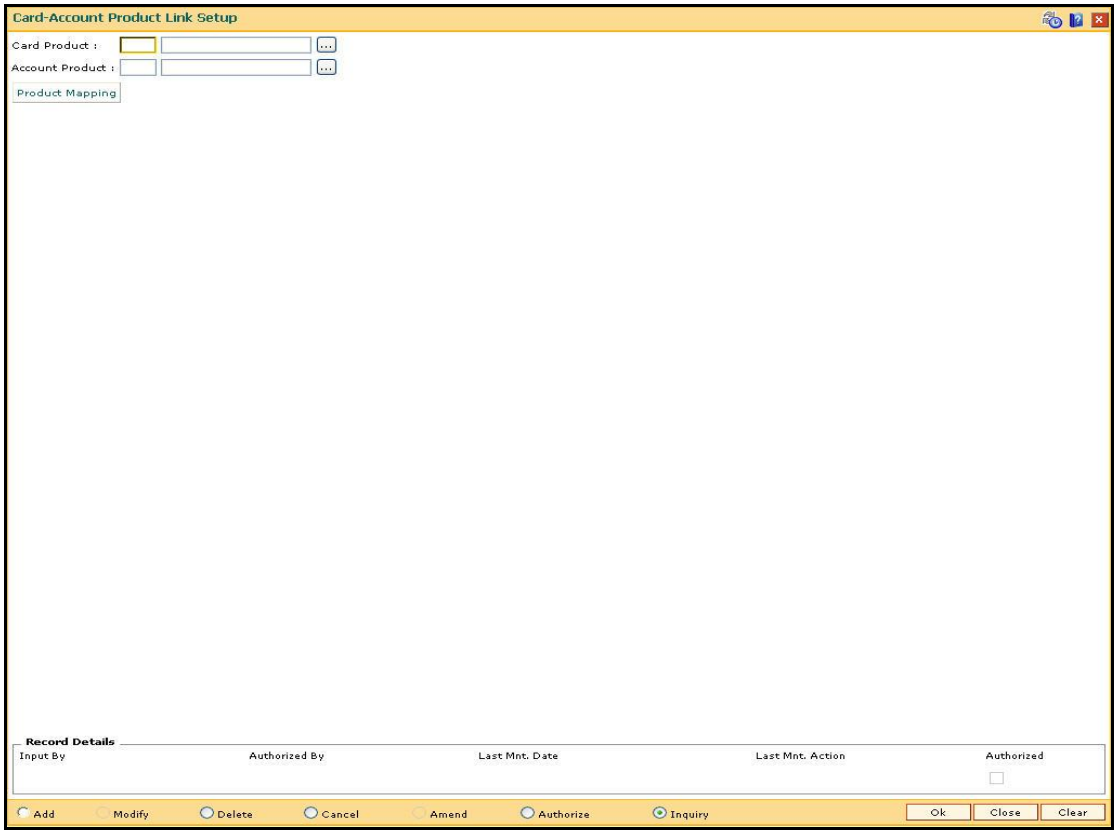
Modes Available

Add, Delete, Cancel, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To link a card product to a account product

1. Type the fast path **CM08** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions >** Card-Account Product Link Setup.
2. The system displays the **Card-Account Product Link Setup** screen.

Card-Account Product Link Setup



Field Description

Field Name	Description

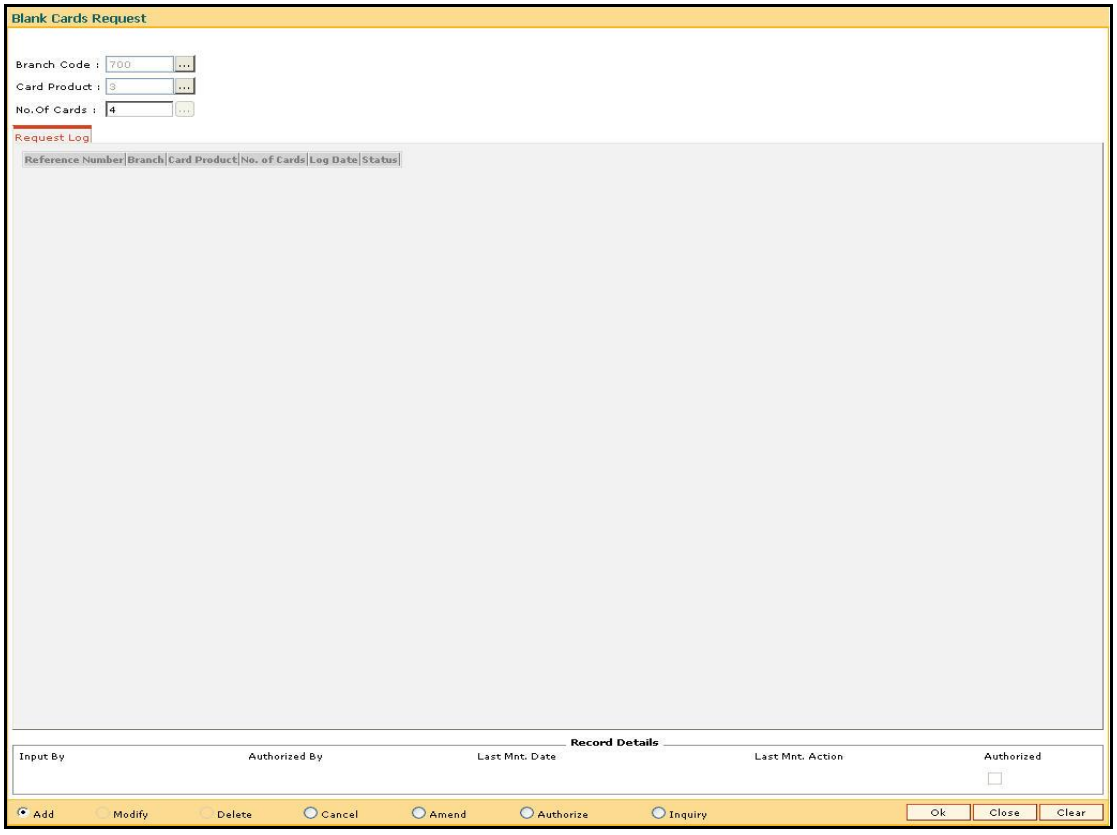
3. Select the branch code and the card code from the pick list.
4. Enter the number of cards.

Blank Cards Request



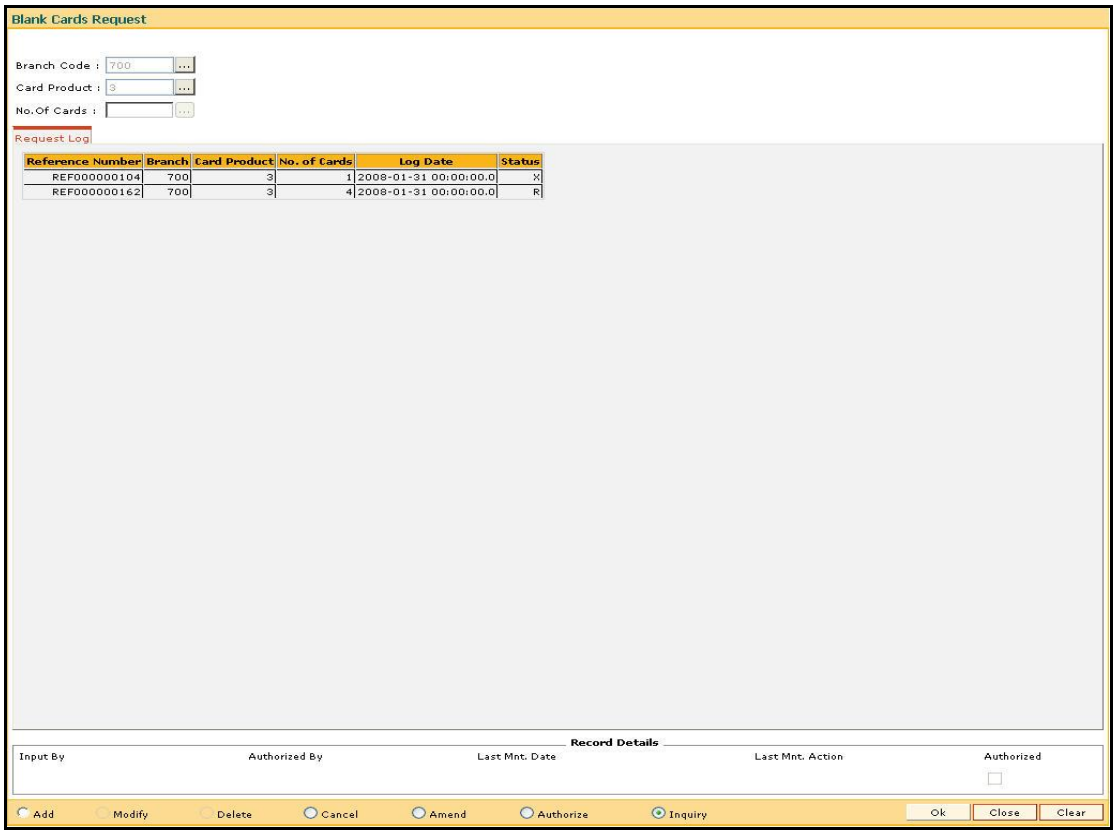
5. Click the **Ok** button.
6. The system displays the message "Record Added...Authorization Pending...Click Ok to Continue". Click the **Ok** button.

7. The blank card requests are added once the record is authorized.

To view the blank cards request

1. Click the **Inquiry** button.
2. Select the branch code and the card code from the pick list.
3. Click the **Ok** button.
4. The system displays the list of blank cards request in the **Request Log** tab.

Request Log



Field Description

Column Name	Description
Reference Number	[Display] This column displays the request reference number using which a particular request can be cancelled, amended or authorized.
Branch	[Display] This column displays the branch code for which the request is made.

Column Name	Description
Card Product	[Display] This column displays the card product to which the requested cards belong.
No. of Cards	[Display] This column displays the number of cards that are requested.
Log Date	[Display] This column displays the date on which the request is made.
Status	[Display] This column displays the current status of the request.

5. Click the **Close** button.

1.4. CM06 - Blank Cards Inventory*

Using this option the current blank cards (pre-prepared cards) inventory can be monitored. The bank requests for the blank cards using the **Blank Cards Request** (Fast Path: CM02) option.

Note: If branch code is not specified, then an inventory for all branches will be displayed. If the card product is not selected, then cards belonging to all products will be displayed. Only those cards which are available and not in use will be counted as part of the inventory.

Definition Prerequisites

- BAM03 - Branch Master Maintenance
- Card Product Definition
- CM02 - Blank Cards Request

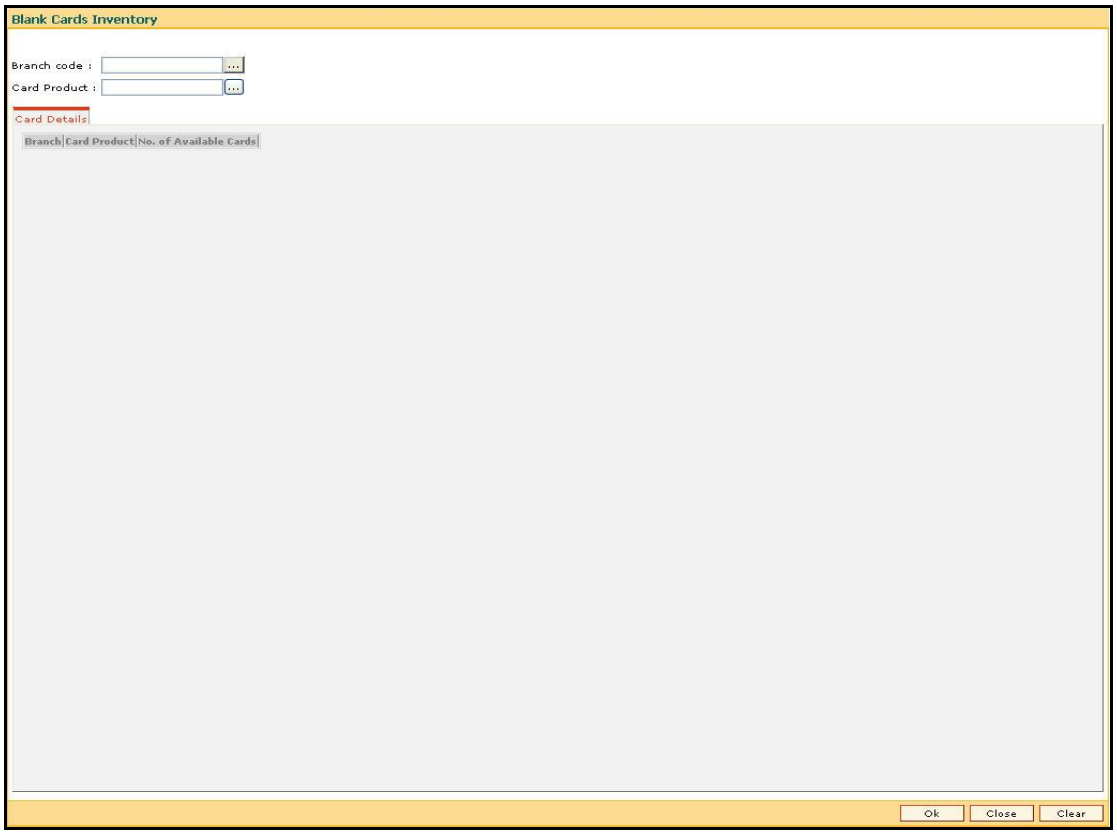
Modes Available

Not Applicable

To view current branch inventory of blank (pre-embossed) cards

1. Type the fast path **CM06** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions >** Blank Cards Inventory.
2. The system displays the **Blank Cards Inventory** screen.

Blank Cards Inventory

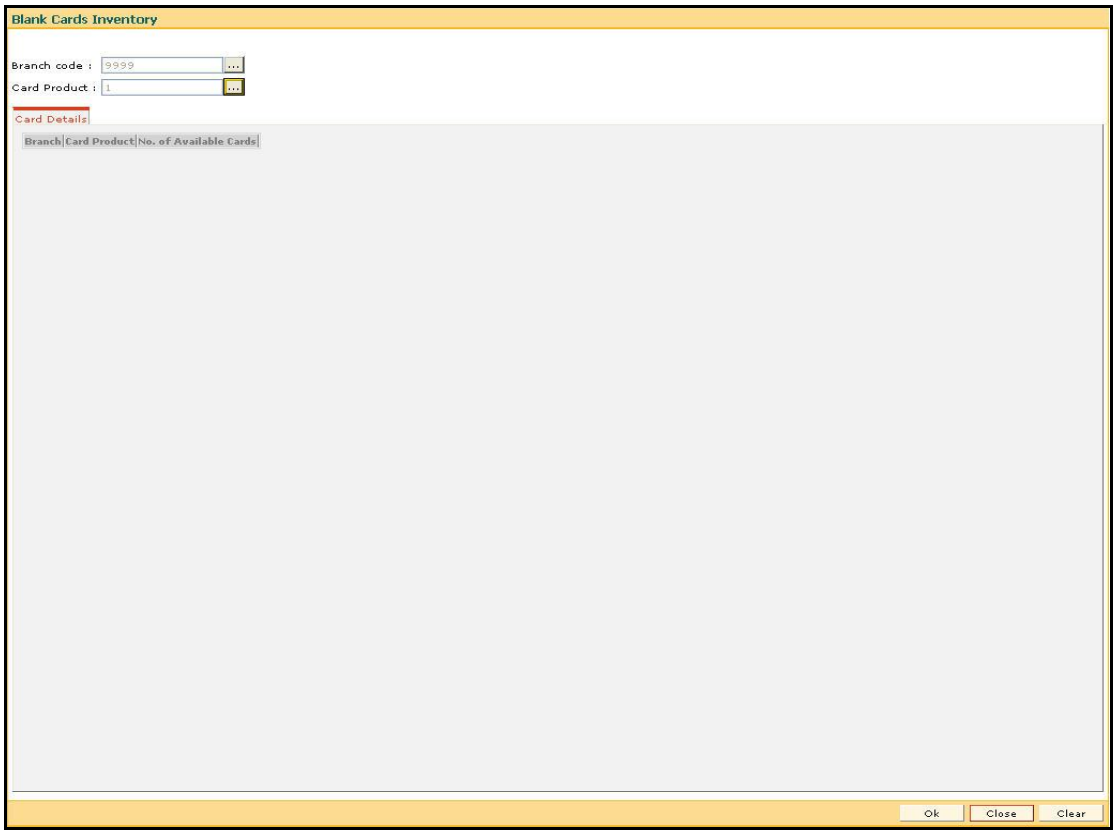


Field Description

Field Name	Description
Branch Code	[Optional, Pick List] Select the branch code to view the inventory of blank cards for that branch from the pick list.
Card Product	[Optional, Pick List] Select the card product to view inventory of blank cards for that product from the pick list.

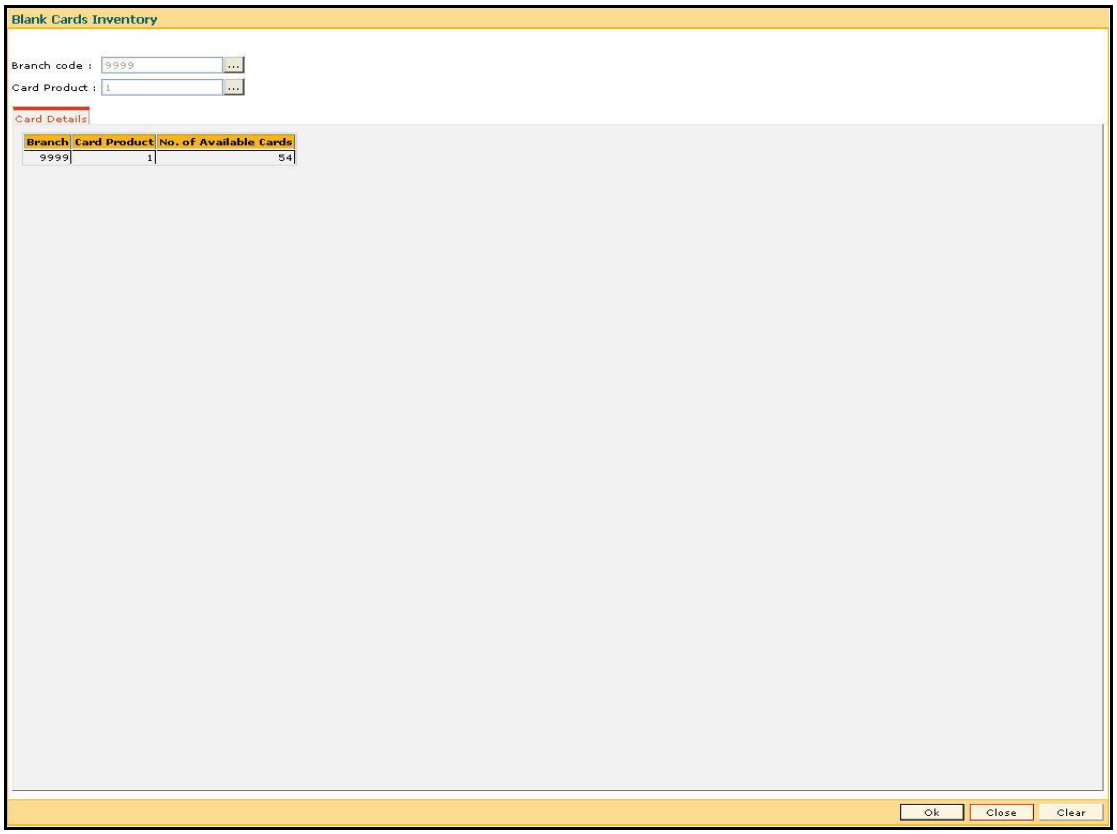
3. Select the branch code and the card product from the pick list.

Blank Cards Inventory



4. Click the **Ok** button.
5. The system displays current branch inventory of blank cards in the **Card Details** tab.

Card Details



Field Description

6. Click the **Close** button.

1.5. CM01 - Card Maintenance

Using this option the bank can issue or reissue a card in batch or an online mode. The card details tab allows you to link the primary account number and the default account number to the card and modify the existing account linkage of a card.

The supplementary cards can also be issued using this option.

Definition Prerequisites

- 8053 - Customer Addition

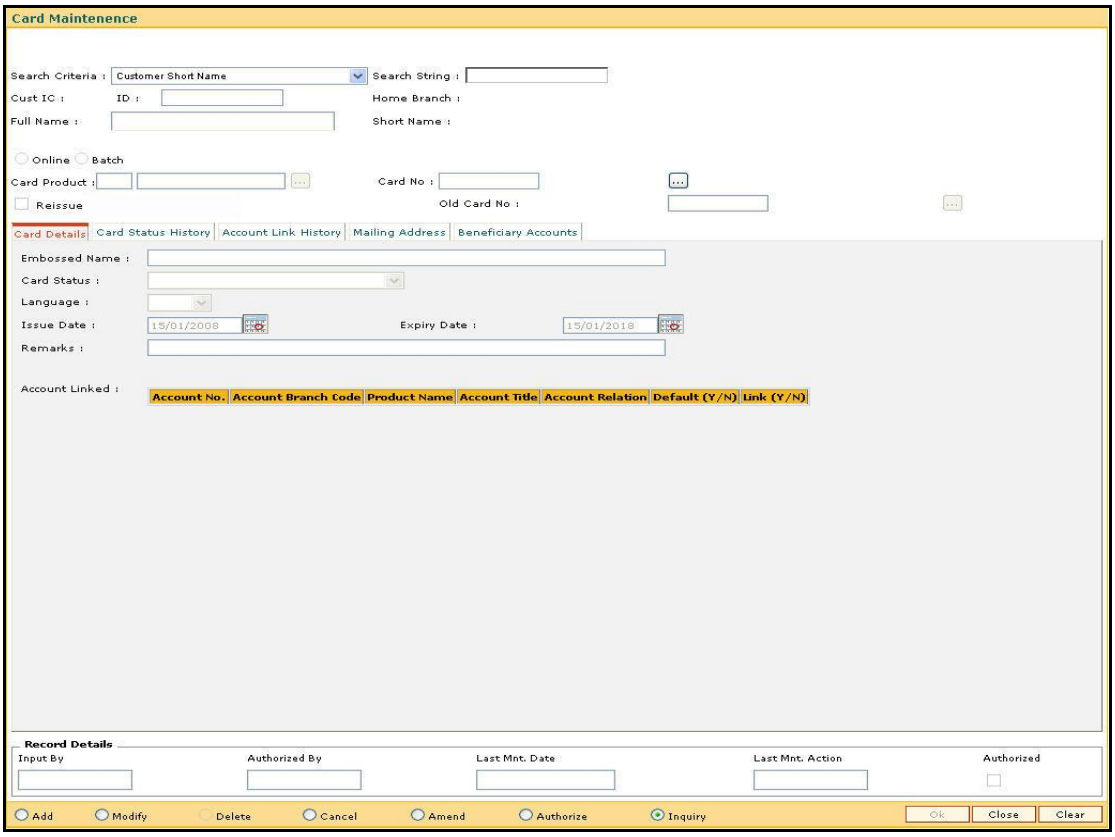
Modes Available

Add, Modify, Cancel, Amend, Authorize, Inquiry. For more information on the procedures of every mode, refer to **Standard Maintenance Procedures**.

To issue or reissue a card

1. Type the fast path **CM01** and click **Go** or navigate through the menus to **Transaction Processing > Customer Transactions >** Card Maintenance.
2. The system displays the **Card Maintenance** screen.

Card Maintenance



Field Description

Field Name	Description
Search Criteria	[Mandatory, Drop-Down] Select the search criteria to search for the customer from the drop-down list. The options are: • Customer short name: The short name of the customer. • Customer IC: The identification criteria (IC) arrived at by the bank during customer addition. • Customer ID: The unique identification given by the bank.
Search String	[Mandatory, Alphanumeric, 20] Type the search string, to search for a customer, corresponding to the search criteria selected in the **Search Criteria** field. If the search criterion is specified as customer's short name or IC then any letter of the short name or IC can be entered. The system displays the pick list of all those customers having those letters in their respective criteria. Choose the appropriate customer from the existing customer list. For example, if the customer's short name is George Abraham. One can search the above customer by entering Geo in the **Search String** field.
Cust IC	[Display] This field displays the identification code of the customer. A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.
ID	[Display] This field displays the ID of the customer. A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the customer IC and the customer category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.

Field Name	Description
Home Branch	[Display] This field displays the short name of the branch, where the customer's account is opened. The customer signature record and the other customer papers are kept in this branch. These short names are maintained in the **Branch Master Maintenance** (Fast Path: BAM03) option.
Full Name	[Display] This field displays the full name of the customer. The full name of the customer is defaulted from the **Customer Addition** (Fast Path: 8053) option.
Short Name	[Display] This field displays the short name of the customer. The short name of the customer is defaulted from the **Customer Addition** (Fast Path: 8053) option.
Card Issue Mode	[Mandatory, Radio Button] Select the appropriate card issue mode. The options are: • **Online**: It allows the user to issue the card in online mode. In online mode the card number needs to be specified. • **Batch**: It allows the user to issue card in batch mode. In batch mode, a request reference number is generated and displayed in the card number field
Card Product	[Conditional, Pick List] This field displays the card product. If the card is to be issued, select the card product from the pick list.
Card No	[Mandatory, Numeric, 20] Select the card number from the pick list. In online issuing mode the card number is mandatory and will be validated against the branch inventory.
Old Card No	[Conditional, Pick List] Select the old card number from the pick list. In case of reissue, an old card number is mandatory and the card status will be validated for Lost or Damaged status.
Actions	

Field Name	Description
Reissue	[Optional, Check Box] Select the **Reissue** check box to reissue a card. The **Card Product** field gets disabled if this check box is selected.

3. Click the **Add** button.
4. Select the search criteria from the drop-down list.
5. Type the search string and press the **<Tab>** key.
6. Select the card product from the pick list.

Field Name	Description
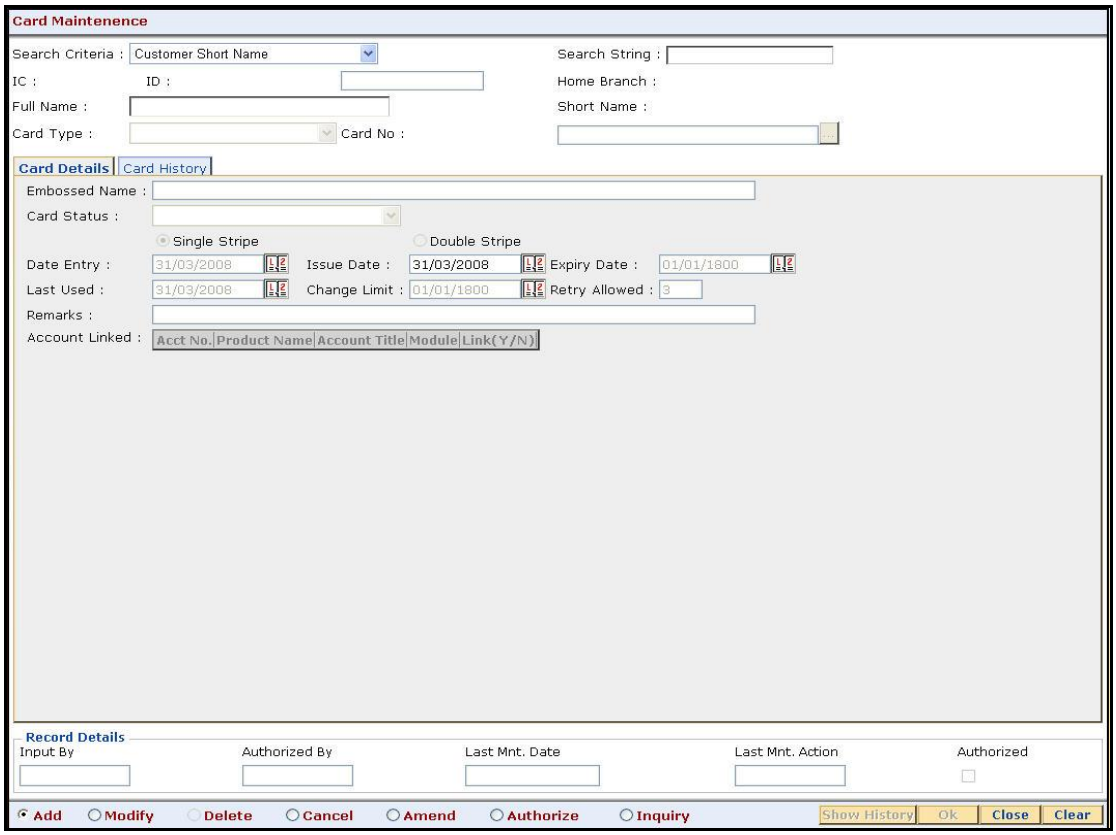
Search Criteria	[Mandatory, Drop-Down] Select the search criteria to search for the customer from the drop-down list. The options are: ▪ Customer Short Name ▪ Customer Ic - Customer Identification criteria (IC) arrived at by the bank during customer addition. ▪ Customer Id - Unique identification given by the bank
Search String	[Mandatory, Alphanumeric, 20] Type the search string, to search for a customer, corresponding to the search criteria selected in the **Search Criteria** field.

Field Name	Description
IC	[Display] This field displays the identification code of the customer. A customer IC along with customer type is a unique method of customer identification across the bank (covering all branches). Based on the combination, the system can identify the customer as an existing customer even when the customer opens a new account in another branch. A social security number, passport number, birth certificate or corporate registration can be used as a customer IC.
ID	[Display] This field displays the ID of the customer. A customer ID is an identification number, generated by the system after customer addition is completed successfully. This running number, unique to a customer across the system, is generated after the system has identified the customer IC and customer category combination to be non-existent in the system. This ID is used for searching and tracking the customer in the system.
Home Branch	[Display] This field displays the short name of the branch, where the customers account is opened. The customer signature record and the other customer papers will are kept in this branch. These short names are maintained in the **Branch Master Maintenance** (Fast Path: BAM03) option.
Full Name	[Display] This field displays the full name of the customer. The full name of the customer is defaulted from the **Customer Addition** (Fast Path: 8053) option.
Short Name	[Display] This field displays the short name of the customer. The short name of the customer is defaulted from the **Customer Addition** (Fast Path: 8053) option.
Card Type	[Display] This field displays the card type.
Card No	[Mandatory, Pick List] Select the card number from the pick list. In online issuing mode the card number is mandatory and will be validated against the branch inventory.

3. Click the Add button.
4. Select the search criteria from the drop-down list.

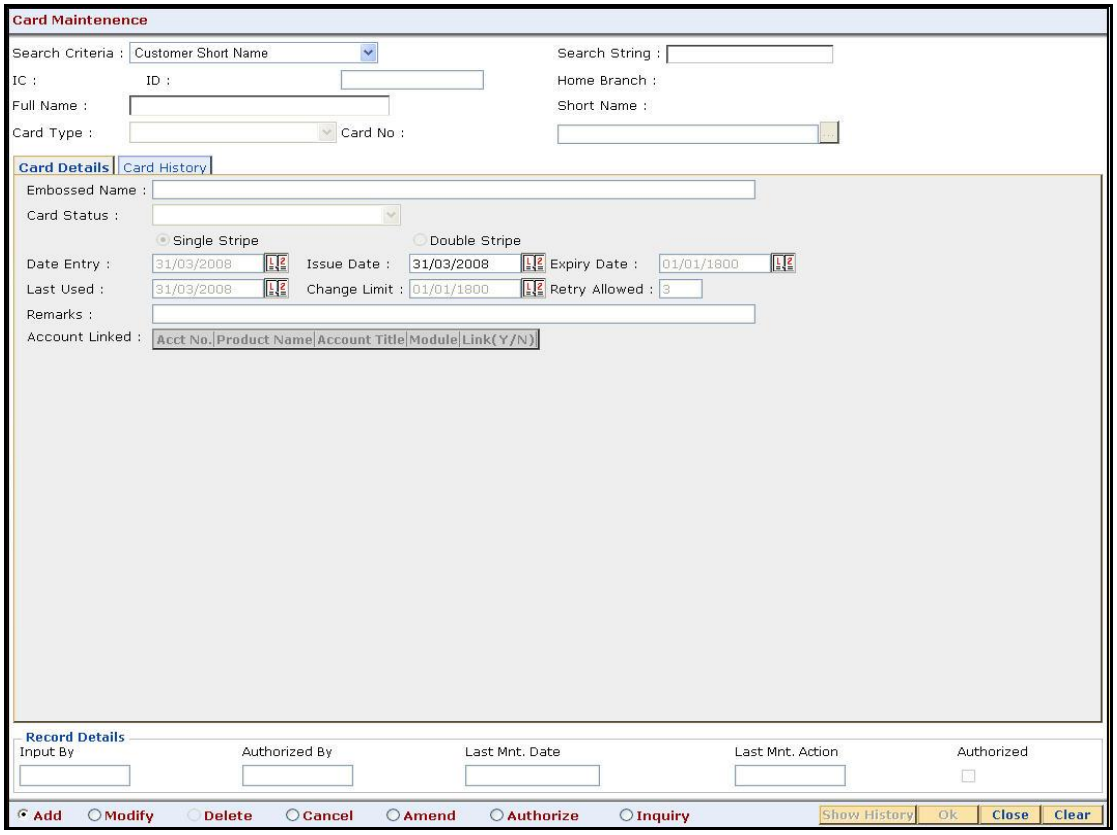
5. Type the search string and press the <Tab> key.

Card Maintenance



6. Enter the relevant information in the various tabs.

Card Details



Field Description

Field Name	Description
Embossed Name	[Mandatory, Alphanumeric, 120] Type the name that will appear on the issued card.
Card Status	[Display] This field displays the current status of the card.
